

Control Network Solutions

OPENING NETWORK FRONTIERS

eLightingTM lighting control for Niagara® AX

CNS is offering web based ***eLighting*** solutions based upon the Niagara AX Framework from Tridium®. These enable your existing or planned intelligent lighting systems to readily meet the demands for accessible, open, flexible lighting control that seamlessly integrates with all existing and future building services and business systems.

*eLighting*TM Solutions for Niagara AX

Why do you need an eLighting solution and Niagara AX?

A major focus of building owners and users is increasingly falling on commercial building lighting systems for the following reasons:-

- ◆ ***It is the most visible sign of energy wastage***—how are you advertising your ***Corporate Social Responsibility*** values to your employees, clients and neighbours?
- ◆ ***The need to comply with the latest EU Energy Buildings Performance Directives***—significant penalties and benefits via business taxation and carbon trading opportunities
- ◆ ***Improve sales and profit***— easier sale, higher margins, tax and carbon trading benefits

Control Network Solutions

O P E N I N G N E T W O R K F R O N T I E R S

- ◆ **Lowering the cost of energy and ownership**— lights on automatically only when needed and at the appropriate level, reduce compliance and maintenance costs and extend the lifetime of the lights and system.
- ◆ **Smarter integration**—between building services and building user needs and business data
- ◆ **Improve user experience**—you or your client 's employees deserve the best
- ◆ **Existing intelligent lighting solutions do not deliver on the above-** with limited ability to integrate to other building sub-systems or your business applications seamlessly they will not deliver the results you need

eLighting offers a complete solution for commissioning, configuration, operation and management of intelligent lighting systems, all in a single web environment. So you can consider the management of the lighting system directly in relation to your business requirements in addition to integrating its functionality with any or all the other building sub-systems installed. This enables you to create a super set of operational strategies to deliver the maximum return from investment whilst fully addressing all the issues identified above.

Niagara AX from Tridium is fast becoming the world's most widely deployed building services integration platform. It offers limitless integration between building sub-systems and integrates seamlessly with business applications for better business management of your facility or facilities. Being web based it allows you, the owner, full access to all building services information from anywhere via any web based platform.
