

Control Network Solutions

OPENING NETWORK FRONTIERS

Have you got what it takes to be involved with a world first product development?

Control Network Solutions Ltd (CNS) is a small company based in Basingstoke with a history of technology leading product development in the world of intelligent control networks and smart solutions.

We are now embarking on a major innovative product development to create the worlds first entirely web based intelligent lighting solution called **eLighting™**.

Initial market response is such that we needed to and successfully did recruit at a talented high flying Senior Software Engineer.

However, we remain interested to hear from you if you think you also have what it takes to contribute to our business. Just forward a letter of introduction and your CV.

We are looking for an exceptional people who should have the following personnel qualities of determination, attention to detail, get things done attitude, able to see the big picture, ability to communicate effectively in all forms at all levels, disciplined approach to quality and timescales are all as important as demonstrable technical skill.

CNS offers the opportunity for you to make a serious impact and be involved in the business in addition to just engineering. This is an ideal opportunity for someone who believes they have what it takes to create a major role at the most senior level.

Essential technical skills are based around Object oriented programming involving JAVA, XML, TCP/IP, C++, C, HTML, UML on embedded platforms. Familiarity with LonTalk®, KNX®, DALI®, SQL, and JAVA Swing also desirable.

Qualifications will be an excellent computing Degree or MSC or similar relevant discipline.
