

elitedali for Niagara AX[®]

Seeking additional Engineering Resource

CNS has launched its latest generation of an exciting web Open Standards lighting control product range under the name *elitedali for Niagara AX[®]*. This is the world's first fully integrated web package for commissioning, control, maintenance and management of DALI[®] intelligent lighting networks directly from within Niagara AX, a globally recognised web convergent technology platform in the building automation industry.

elitedali offers fully integrated lighting control and management with other BMS systems within Niagara AX offering scope to **save energy, address CO2 emissions, claim Enhanced Capital allowances, visually demonstrate Corporate Social Responsibility and meet all current and future Building Directives and Regulations.**

We have and continue to establish global routes to market via Tridium and Honeywell System Integrators who we train and certify as *elitedali Partners*. We now need to add a talented individual to provide technical pre and post sales partner support, applications engineering capability in addition to supporting on-going developments of this innovative product.

CNS secured UK Government funding at the end of 2011 to accelerate the growth of business based around *elitedali for Niagara AX[®]*.

Initial reaction from around the world to *eLighting* has been very encouraging and this represents a key moment for the right individual to make their mark both nationally and internationally.

If you think you have the necessary technical, commercial and interpersonal skills to handle our current and future clients from around the world then please do not hesitate to contact Mike Welch directly with your CV and a covering letter explaining why you think you would be the right choice for this role.
