

Control Network Solutions

OPENING NETWORK FRONTIERS

Now the UK Government makes it easier to invest in eLighting™ intelligent lighting solution

With lighting in Commercial premises* accounting for more than 30% of the total electrical load, if you want to reduce the amount of electrical energy consumed by your lighting system by up to 75% you need a fully automated lighting solution. Then here's a great offer from the Carbon Trust.

They are offering 0% business loans from £3,000 – £400,000 to help replace old, inefficient equipment with new, more efficient alternatives.

Spend nothing whilst saving money

The loans are unsecured and cover the capital cost of equipment and installation, with repayments calculated to be offset by your anticipated monthly energy savings, so the loan should pay for itself, saving you money year after year.

It's quick and easy to apply

The loan scheme is government backed and applying online is easy – there are no arrangement fees and you'll have a conditional decision within 24 hours.

So what are you waiting for? Funds are limited so call the Carbon Trust now on 01865 885 840 or visit the website to apply.

eLighting™ is the world's first entirely web based DALI® intelligent lighting system solution for commissioning, control and management focussed on globally accepted Web and DALI Open Standards for a future proof solution available from providers worldwide.
