

*elitedali for Niagara AX®*

## Certified elitedali Partner and Niagara AX® team up to save Data Centre energy 50%

Airmaster Australia Pty Ltd, a Certified elitedali Partner, has just completed its first elitedali for Niagara AX project.

This retrofit installation and commissioning of an elitedali lighting solution was completed seamlessly for a major Data Centre provider in the region. As was expected, significant energy savings are now being delivered by this entirely web based DALI® automated lighting solution

It is expected that Airmaster will now be asked to deliver more such solutions to this national Data Centre client.

Details of the project will follow in the next few weeks in the form of a paper being written currently by Airmaster which we will publish on our website.

In the meantime for more information contact either Mike Welch:
